

# REACH Declaration

## Managing substances

Nokia aims to have full knowledge of substances in our products, meeting or even exceeding applicable laws and regulations and minimize adverse impacts on human health and the environment. Nokia Substance List details items that are banned, restricted, targeted for reduction in the future, or required to be reported in our products and product packaging (such as but not limited to lead, mercury and cadmium). Nokia Substance List is integrated into our product requirements.

Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) is managed by the European Chemicals Agency. Substances are added to the candidate list of substances of very high concern (SVHC) twice a year. Article 33 of REACH requires a supplier of articles containing a listed candidate SVHC in a concentration above 0,1% weight by weight (w/w) to provide the recipient with sufficient information to allow safe use of the article including, as a minimum the name of that substance.

## REACH Declaration for Steel HR

The table below represents Nokia's current understanding of its obligations to communicate and provide information on substances in accordance with REACH Regulation Article 33, related to the Steel HR product.

Substance of Very High Concern	CAS Number	Item
1,3-propanesultone	1120-71-4	Battery

This declaration was last updated on 16 January 2017.

The information in this REACH Declaration is based on Nokia's current knowledge at the time stated above. This declaration will be updated when changes occur or new substances which affect this product are added into the Candidate List. This declaration is provided "AS IS" basis without express or implied warranties or commitments. Nokia does not warrant that the declaration is error free and therefore reserves the right to update and modify the above declaration when necessary or appropriate.
